

# The RigB 3R for the VM500 & 700 Ranges

## Prices and Ordering

Currently available in black or Red, the RigB 3R fits the AT VM500, 600 & 700 ranges. And also many older cartridges such as the 440MLa, 440MLb, AT120E, MLX etc etc – essentially all the cartridges which use AT's top MM generator.

It is available as kit to be fitted to your existing cartridge (if you have one), or we can fit it for you at no further charge. Take a look at the fitting instructions if you want to assess whether you are happy to fit it yourself.

It can also be supplied ready fitted to a brand new AT cartridge and this will generally cost less than buying a cartridge elsewhere and then buying the RigB kit.

It is supplied with the three anodised allow screws and a stepped washer to allow the front screw to be used on older Rega arms which have a 4mm hole.

### Prices for DIY fitting kit:

All colours (Black, Blue, Gold, Red): £139

(UK postage included, +£5 for anywhere else in the world std airmail, or £15 Tracked)

Prices for brand new cartridges with RigB fitted:

Examples: VM540ML with RigB £R fitted £339

VM500 series with RigB 3R and Paratrace Stylus £379

VM760SLC with RigB 3R fitted £639

(UK Tracked postage included, +£15 for anywhere else in the world)

To order any of the above, please email Maryna on:
